

Codificación Recursiva Primitiva

Definición 1 (Codificación recursiva primitiva). Sea M una L-estructura numerable.

Una codificación recursiva primitiva de M es una biyección $\sigma: M \rightarrow \mathbb{N}$ tal que

- Si f es un símbolo de función de aridad k , $\sigma \circ f^M \circ \sigma^{-1}: \mathbb{N}^k \rightarrow \mathbb{N}$ es recursiva primitiva.
- Si R es un símbolo de relación de aridad m , $R^M \circ \sigma^{-1} \subset \mathbb{N}^m$ es recursiva primitiva.

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
