

Curvas características de una EDP casi lineal de primer orden

Definición 1 (Característica). $\gamma: \mathbb{R} \longrightarrow \mathbb{R}^3$ es una curva característica de la EDP casi lineal de primer orden (edp-casi-lineal-o1-sistema-caracteristico/Equation (1))

$\Longleftrightarrow \gamma = (x, y, z)$ es solución al sistema característico asociado.

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
