

Conexión simple

Definición 1 (Conexión simple). Sea X un espacio topológico conexo por arcos,

X es simplemente conexo $\iff \forall x_0 \in X : \Pi_1(X, x_0)$ es trivial.

Intuitivamente, un espacio simplemente conexo es aquel que no tiene “agujeros”.

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
