

Métrica del máximo en $\mathbb{R}^n$

Ejemplo 1 (Métrica del máximo). Sea $n \in \mathbb{N}$. Entonces,

$$\forall x, y \in \mathbb{R}^n : d_\infty(x, y) := \max_{1 \leq i \leq n} |x_i - y_i|$$

define una métrica en $\mathbb{R}^n$ que se llama la *métrica del máximo* de $\mathbb{R}^n$.

Referenciado en

- El límite de la métrica p -adica en $\mathbb{R}^n$ es la métrica del máximo+

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
