

La intersección de topologías es una topología

Proposición 1. Sean $\{\mathcal{T}_i\}_{i \in I}$ una familia de topologías de un conjunto $X \neq \emptyset$

$$\implies \mathcal{T} = \bigcap_{i \in I} \mathcal{T}_i \text{ es una topología de } X.$$

Además, $\bigcap_{i \in I} \mathcal{T}_i$ es una topología más gruesa que todas las $\mathcal{T}_i$.

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
