

# Desigualdad de Bessel

**Teorema 1 (Desigualdad de Bessel).** Sea  $(H, \langle \cdot, \cdot \rangle)$  un espacio prehilbert y  $\{u_n\}_{n \in \mathbb{N}}$  un sistema ortonormal en  $H \implies \forall x \in H : \sum_{n=1}^{\infty} |\langle x, u_n \rangle|^2 \leq \|x\|^2$ .

**Demostración:** Calculamos la norma del vector  $x - \sum_{n=1}^N \langle x, u_n \rangle u_n$ :

$$\begin{aligned} 0 &\leq \left\| x - \sum_{n=1}^N \langle x, u_n \rangle u_n \right\|^2 = \left\langle x - \sum_{n=1}^N \langle x, u_n \rangle u_n, x - \sum_{m=1}^N \langle x, u_m \rangle u_m \right\rangle \\ &= \|x\|^2 - \sum_{n=1}^N \overline{\langle x, u_n \rangle} \langle x, u_n \rangle - \sum_{m=1}^N \langle x, u_m \rangle \langle u_m, x \rangle + \sum_{n=1}^N \sum_{m=1}^N \overline{\langle x, u_n \rangle} \langle x, u_m \rangle \langle u_n, u_m \rangle \\ &= \|x\|^2 - 2 \sum_{n=1}^N |\langle x, u_n \rangle|^2 + \sum_{n=1}^N |\langle x, u_n \rangle|^2 = \|x\|^2 - \sum_{n=1}^N |\langle x, u_n \rangle|^2. \end{aligned}$$

Por tanto,  $\forall N \in \mathbb{N} : \sum_{n=1}^N |\langle x, u_n \rangle|^2 \leq \|x\|^2$ . Tomando límite cuando  $N \rightarrow \infty$ , se obtiene la desigualdad de Bessel. ■
