

Variables

Definición 1 (Conjunto de variables). Sea L un lenguaje de primer orden, X es un conjunto de variables para $L \iff X$ es un conjunto disjunto de L .

- A cada elemento de X se le llama variable simple.
- A cada subconjunto de X se le llama variable.
- A cada variable ordenada se le llama tupla de variables sin repetición.

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
